
Mauna Loa Solar Observatory Observer's Log

Wed Oct 9 16:04:42 GMT 2019

Year: 19 Doy: 282

Observer: waters

WEATHER COMMENT: waters: Wed Oct 09 16:41:18 GMT 2019

Temp 40F with windspeed at about 9-14mph from the South. Sky looks clear with some clouds on the Eastern horizon but we should be able to start up since they are low.

GENERAL COMMENT BY berkey: Wed Oct 09 23:35:33 GMT 2019

During 01 cleaning the poron gaskets for the tube cover in front of the 01 were replaced. This included the 2 hemishpere gaskets on the moving caddy, and the complete annulus gasket that is attached to the back end of the fore-optics enclosure.

All 3 parts showed some damage, but I think most of the damaged sections were situated where all/most of the particles that could become dislodged in the damaged would end up outside of the telescope tube.

WEATHER COMMENT: berkey: Thu Oct 10 02:23:13 GMT 2019

Looks like it won't clear up today.

T-storms in the forecast for tomorrow.
