GENERAL COMMENT BY waters: Fri Jun 12 17:12:52 GMT 2020

Holding off on starting up Shabar as I have the dome turned as far Northeast to reduce the shake on the spar from the wind and this blocks Shabar.

At PA 232, a prominence has been evolving since start up. It seems to dissipates around 21:26:04UT but the cavity it is in continues to move throughout the day.
