KCOR COMMENT BY lisapg: Fri Dec 11 23:23:48 GMT 2020

Something seemed to be wrong with Labview on Kcor computer. The MC4U controller GUI started resetting itself over and over again and there was a large spike in the laggedX and laggedY in socketcam (from 0 to 4200). It started happening when monitor 2 was not on Kcor computer but when I switched, it still wouldn't respond, just kept resetting itself. After seven iterations in socketcam, the glitch or whatever was happening to the MC4U controller GUI stopped and I could access it again. Have no idea what happened or why it resolved itself.
