KCOR COMMENT BY berkey: Fri Jul 08 17:20:28 GMT 2022

Found the taped failed on the closed loop hepa output again, and the ducting was hanging away from the spar.

Duct was reinstalled and retaped back up.

GENERAL COMMENT BY berkey: Fri Jul 08 17:25:25 GMT 2022

While blowing off the kcor field lens, an attempt was made to cover the unused field lens door fastener holes with electrical tape.

We expect no change to kcor image quality, but this may help dust. in the tube.

GENERAL COMMENT BY berkey: Sat Jul 09 00:54:26 GMT 2022

The format of the CME email and logging alerts has change to the following format:

TIME: [HH:MM:SS] UT PA: [YYY] deg WIDTH: [XX] deg Observers report with [high|medium|low] confidence a CME at the time, position angle, and width noted. [CME was already in progress at the start of observing]. [Any other description BEST EVER!, VERY FAST! etc].

This should allow for easier parsing by the code that automatically handles these alerts.
