UCoMP COMMENT BY Observer: Mon Mar 24 18:06:09 GMT 2025

Ucomp had an issue with the cameras but we were able to resolve it. Currently trouble shooting the occulter as we are currently not getting any feed back on where the occulter is.

GENERAL COMMENT BY Observer: Mon Mar 24 18:28:16 GMT 2025

Setting UCOMP to save every frame (instead of avg by numsum) this will mean the 5wave synoptic files are now 12gb but we should be able to better kick out bad drams.

In this mode each sum a new fits extension.

Turning off save all because it looks like we're missing frames in the previous data.

UCoMP COMMENT BY Observer: Mon Mar 24 19:37:14 GMT 2025

Cropico has been reporting temperatures of 0 since starting up UCoMP. We were calculating voltages for all the stages wrong. Cycling cropic and restarting the program seems to have fixed the problem.
