Thank you for expressing interest in the possibility of locating SOLIS at your site. As you know, NSO is undertaking a comprehensive relocation process to transition from its historic sites in Sunspot New Mexico and Tucson Arizona to its new locations in Maui Hawaii, and Boulder Colorado. A major aspect of this evolution is the relocation of the SOLIS instrument package from Arizona to a new site.

This package contains:

- Technical details of the instrumentation (solisTechDescription)
- Views of the current SOLIS installation in Tucson (solisViews)
- A list of questions that must be answered for the selection (solisQuestions)
- The selection criteria (solisCriteria)
- Schedule for the selection process and installation (solisSchedule)
- Drawings of the instrument (SOLIS General Assy-Ref (1.29.14).PDF and SOLIS Shelter Site Assy (1.8.14 Const. View).PDF)
- Directory of photos taken during the relocation from Kitt Peak to Tucson (images)

Please address questions to Frank Hill at the addresses above.

Regards,

A handwritten signature in black ink that reads "F Hill". The signature is written in a cursive, slightly slanted style.

Frank Hill
NSO Associate Director, Synoptic Program
